IT IS TIME FOR ACTION!

There are concrete things that we can do as parents, family members, friends, and citizens to save lives and help end this terrible epidemic. The most important work we can do is PREVENTION – helping young people avoid using substances that rewire their brains and predispose them to addiction throughout their lives. Our keynote speaker, **Prof. Harvey Milkman, PhD**, has spent his career developing strategies that work to prevent and reduce substance use among young people.
